SUMMARY — Dedicated professional eager to contribute to a prestigious organization, where I can leverage and enhance my diverse skill set, while gaining valuable experience and advancing my career in a dynamic and growth-oriented environment.

TECHNICAL COMPETENCIES

Languages Python, Bash, JavaScript, C++

CI/CD Jenkins, GitHub Actions,

Cloud AWS, GCP, Azure

IaC Terraform, CloudFormation, Pulumi

Configuration Ansible, Chef, Puppet, SaltStack

Containerization Docker, Kubernetes, ECS, EKS, AKS

Monitoring Prometheus, Grafana **Logging** Elastic Stack ELK

Networking TCP/IP, DNS, Load Balancers, VPN, VPC

Security OAuth, JWT, SSL/TLS, IAM, SSO

Scripting Shell Scripting, PowerShell Build Tools Maven, Gradle, Ant **Service Mesh** Istio, Linkerd, Consul

Message Queueing RabbitMO, Apache Kafka, AWS SOS Web Development Node.js, Express, Nginx, Apache

Frontend Frameworks React, Angular, Vue.js Operating Systems Linux, Windows, macOS Management Git, Jira, Confluence **Documentation** Markdown, LaTeX

Secrets Management HashiCorp Vault, AWS Secrets Manager

RECENT EXPERIENCE

- Avrioc Technologies Senior Software Engineer / DevOps Specialist

 Participated in building a Chess Engine using multiple technologies, ensuring efficient integration with DevOps practices.
- Led the development of a scalable and resilient Chess platform using NodeJS/React, deployed on AWS using Kubernetes. - Contributed to multiple AI services across the company, ensuring seamless integration and deployment.
- Implemented data pipelines: Designed and implemented data pipelines using between Cassandra and Elastic Search.
- Optimized data storage and retrieval processes using NoSQL databases like Cassandra and Redis, ensuring scalability, performance, and reliability for handling diverse data sets across the Chess Engine and AI services infrastructure.
- Automated deployment processes with Jenkins, improving release management and reducing manual intervention.
- Enhanced system monitoring and alerting using Prometheus, and ELK Stack, improving system reliability and uptime.
- Tasks included: Coding, testing, release, and documentation for deliverables.
- Technologies used: AWS, Kubernetes, Docker, Terraform, Jenkins, Cassandra, Redis, Prometheus, Grafana, ELK Stack, NodeJS, React, C++, Python, JavaScript, and Bash scripting.

September 2019 - May 2023

- HCL Technologies Senior Software Engineer

 Contributed to the Great Voice-to-Meaning platform "Houndify" to support Arabic voice recognition and understanding, focusing on Natural Language Processing for Modern Standard Arabic.
- Built several detailed domains for the platform for car control and knowledge domains.
- Integrated and conditioned external data from different data providers to expand Houndify's knowledge.
- Developed and maintained multiple sub-modules for the Houndify platform, ensuring robust functionality.
- Conducted extensive testing, debugging, and optimization of the platform's backend systems.
- Tasks included: Coding, testing, release, and documentation for deliverables.
- Technologies used: C, C++, Python, JavaScript, Lua, Bash scripting, Docker, Kubernetes, Jenkins.
- Omdurman Ahlia University Infrastructure Engineer

March 2017 - May 2019

- Participated in the design and implementation of a new university datacenter, network and infra deployment.
- Managed virtualized environments using XenServer, ensuring high availability and performance of university systems.
- Developed and maintained software solutions for university systems, including student systems, KOHA.
- Configured and monitored network security measures, including firewalls and intrusion detection systems.
- Automated routine maintenance tasks and patch management using Bash scripting.
- Participated in disaster recovery planning and drills, enhancing the university's ability to recover from potential data loss.
- Provided technical support and training to staff and students, ensuring efficient use of university IT resources.
- Maintained documentation of IT infra, policies, and procedures to ensure compliance and facilitate troubleshooting.
- Technologies used: XenServer, VMware, firewalls, intrusion detection systems, and automation and scripting tools.

EDUCATION

New Kalakla Secondery School

2005 - May 2010

Omdurman Ahlia University BS.c of Computer Engineering

2009 - May 2014

PROFESSIONAL CERTIFICATIONS
